Shubhankar Radhakrishna

Seeking Full-Time Roles : AI Engineer, Data Analyst/Engineer, Business Analyst | MS Data Analytics @ Northeastern University
Boston, Massachusetts, United States

Summary

Driven data analyst with a solid track record of uncovering actionable insights from large, complex datasets. Proficient in SQL, Python, and Tableau, with a knack for translating data into clear, impactful stories for diverse audiences. Experienced in supporting strategic decisions through thoughtful analysis and dashboarding. Passionate about using data to improve processes, elevate performance, and drive smarter business outcomes. Always curious, always learning.

Experience

Saayam For All

Data Analyst

February 2025 - Present (10 months)

San Jose, California, United States

Northeastern University

Data Analyst / Building Supervisor

April 2024 - December 2024 (9 months)

Boston, Massachusetts, United States

- Supervised daily operations of Campus Recreation facilities, ensuring safety, compliance, and staff performance.
- Collected and analyzed hourly equipment usage and floor traffic data to identify peak periods and optimize maintenance scheduling, reducing machine downtime by 20% while overseeing overall facility operations.
- Designed and evaluated member satisfaction surveys to uncover service improvement opportunities, contributing to a 15% increase in Net Promoter Scores through targeted service enhancements.
- Delivered customer service by assisting patrons, processing transactions, and addressing inquiries.
- Oversaw opening and closing protocols, conducted facility rounds, and enforced policies to ensure operational excellence.

TerraPact

Data Intelligence Analyst

June 2023 - November 2023 (6 months)

Burlington, Massachusetts, United States

- Executed comprehensive exploratory analysis and data validation on geo-spatial datasets, achieving a 15% reduction in data errors and enhancing overall consistency, leading to a more reliable foundation for future analytical processes.
- Enhanced the integration of a centralized database by leveraging insights from kml analyses and web-scraped data, improving data accuracy and accelerating ingestion—saving up to 6 hours weekly.
